13	Negotiations, if required, as per SPP Rule-83(1)	Negotiation Committee
14	Issuance of Letter of Intent / Notification of Award per lot, published on EPADS	Procuring Agency

Stage	Activity	Responsibility
15	Execution of Contract Agreement and submission of Performance Guarantee (3% of contract value)	Training Institute & BBSHRRDB
16	Commencement of training subject to fulfilment of all pre-commencement conditions	Training Institute

NOTE: An institute may be selected for multiple lots provided it demonstrates adequate capacity (infrastructure, trainers and financial strength) to deliver all awarded lots concurrently, as verified during the baseline visit.

3.11 BASELINE / PHYSICAL VERIFICATION VISITS

Purpose: Baseline visits independently verify the claims made by a Training Institute in its Technical Proposal — physical premises, infrastructure, laboratories/workshops, equipment and trainer availability — before technical scores are finalized. No institute shall be awarded a lot without a satisfactory baseline visit report.

Timing: Baseline visits are carried out after opening of Technical Proposals and before finalization of technical evaluation, i.e. prior to opening of Financial Proposals. BBSHRRDB shall endeavor to complete all baseline visits within fifteen (15) working days of the technical opening.

Team Composition: Each visit shall be conducted by a team comprising at least one representative of the Procurement Section, one representative of the relevant District office (where applicable), and a technical/subject-matter expert for CBTA trades. Visits may be unannounced or with minimal prior notice to ensure authenticity of findings.

TRADE-WISE BASELINE EVALUATION PROFORMAS — TRANSPARENCY OF THE MARKING SYSTEM

BBSHRRDB has prepared a separate Baseline Evaluation Checklist for each approved trade. Each checklist sets out the exact parameters the Baseline Verification Team inspects at the institute — classroom and workshop space, tools and machinery, trade-specific equipment and consumables, safety arrangements, trainer credentials and, for CBTA trades, competency assessment stations.

In the interest of transparency and to enable bidders to prepare adequately, all trade-wise checklists are published and available for download at:

https://www.bbshrrdb.gos.pk/procurement/

Bidders are strongly advised to download the checklists for every trade they intend to bid for, and to ensure their facility, equipment and trainers meet the stated parameters before the baseline visit.

Scope of Verification: In addition to the trade-specific parameters in the proforma, the team shall verify and record, with photographic and GPS-tagged evidence:

- Physical existence of the institute at the address/GPS coordinates declared in Part TA of the Technical Proposal.
- Ownership or rental status of the premises (utility bill / rent agreement cross-check).
- Physical presence and verification of original qualification documents of proposed trainers, cross-checked against the CVs submitted.
- Basic facilities: electricity/backup generator, drinking water, washrooms, first aid, and trade-relevant safety equipment.
- Cross-verification of any claimed previous training experience, placement linkages or client references.

Scoring Impact: The baseline visit report is a mandatory input to the final technical score. Material discrepancies between the Technical Proposal and the baseline findings (for example, non-existent premises, absent equipment, or unverifiable trainers) shall result in proportionate deduction of marks and, in cases of serious misrepresentation, outright technical disqualification and possible reporting for blacklisting under SPP Rule-35.

Documentation: A signed Baseline Visit Report — comprising the completed trade-wise proforma, photographs and GPS location — shall be prepared for each visited institute and retained as part of the permanent procurement record for audit purposes.

3.12 CBTA TRAINER / TUTOR REQUIREMENTS

What is CBTA: Competency-Based Training and Assessment (CBTA) is the NAVTTC-endorsed methodology under which trainees are trained and assessed against defined, measurable competency standards rather than time spent in a classroom. Of the 51 approved curricula under Phase XVII, 30 are CBTA trades and 21 are Short Courses; the classification for each trade is given at Annexure I, and the district-wise lot schedule for those trades currently allocated to lots is given at Annexure II.

General CBTA Tutor Requirements: For every CBTA trade, in addition to the trade-specific Minimum Tutor's Qualification prescribed at Annexure I, the proposed trainer MUST also satisfy the following:

- Hold a recognized trade certification at or above the competency Level specified for that trade at Annexure I.
- Demonstrate the ability to deliver training using the CBTA methodology — structured demonstration, guided practice and objective competency assessment against checklists — rather than lecture-based delivery alone.
- Meet the minimum industry and/or teaching experience specified for the trade at Annexure I.
- Communicate effectively in Urdu/Sindhi and, where the curriculum requires, in English.
- Preferably hold a Trainer-of-Trainers (ToT) / Master Trainer or Assessor certification recognized by NAVTTC or an equivalent accredited body.
- Be physically available at the training site for the full duration of the course; substitution of trainers requires prior written approval from BBSHRRDB.

Verification: CBTA trainer qualifications and physical presence are verified during the baseline visit (Clause 3.15) through original certificate inspection and, where feasible, a brief competency discussion or demonstration relevant to the trade.

3.13 AWARD OF CONTRACT

After completing evaluations, the Procuring Agency shall award contracts to the selected training providers. Results shall be published on EPADS (sindh.eprocure.gov.pk), the BBSHRRDB website (www.bbshrrdb.gos.pk) and the SPPRA website (www.pprasindh.gov.pk). Contract award information shall be uploaded on EPADS as mandatory under SPPRA requirements.
