## EXECUTIVE SUMMARY

The Project Management Unit (PMU), of Benazir Bhutto Shaheed Human Resource, Research and Development Board (BBSHRRDB) established in the Mehran University of Engineering & Technology, (MUET) Jamshoro at Office of Research, Innovation & Commercialization, PMU facilitated to conduct Third Party Validation (TPV) of the trained participants under the contract with the Benazir Bhutto Shaheed Human Resources Research and Development Board [BBSHRRDB], In accordance with the Memorandum of Understanding (MoU) signed between BBSHRRDB and MUET Jamshoro, in order to conduct Skill Development Training 02-batches of (06 Months each). PMU-BBSHRRDB-MUET, Jamshoro trained 760 youth in various employable trades 1st Batch of the Program commenced from 16<sup>th</sup> September, 2019 to 15<sup>th</sup> March, 2020 and the 2<sup>nd</sup> Batch was commenced from 19<sup>th</sup> October, 2020 to 18<sup>th</sup> April, 2021. The gap between the training period was observed due Outbreak of COVID19 to strict compliance of the directives by the concerned authorities. i.e., BBSHRRDB as well as Universities and Boards Department, Government of Sindh. The training of 2nd Batch was conducted with complete SOPs. The total period of PC-I was scheduled to be completed in 15 months, whereas the training completed approximately in two years.

The objective of the assignment was to verify / validate trainer's credentials and experience, curriculum in conformity with the prescribed syllabus, training delivery, confirmation of training from graduates/trainees, duration, attendance, certification of trainees and confirmation about the employability created as a result of the project delivered.

In order to verify /validate the results achieved under the above objectives the consultants were engaged to develop the methodology for the verification from the trainers, training institute and trainees. Methodology was developed with the tools and telephonic survey of the selected trained youth was conducted of the selected youth by applying the random sampling from the pool of trainees. A questionnaire was developed, interviews were conducted.

Using Orasoft calculator, the sampling was calculated with 95% confidence and 5% margin of error. With this sampling framework, out of 760 youth, 256 youth were interviewed.

Regarding the validation of trainers, curriculum, the meetings and visits were conducted to verify them.

The consultant gathered the information in a representative sample of training programs throughout all programme aspects, collecting data from the sample trainees.

## Results

- All the sample trainees fall in the age group of 18-35 years.
- CVs of all the trainers verified and meetings conducted with almost all the trainers present either at the campus or telephonic interviews were conducted.
- Curriculum was present at PMU-BBSHRDB-MUET, Jamshoro and it was verified in relevant trades.
- All the participant trainees confirmed that the trainings were delivered with the participatory approaches including the practical sessions. Powerpoint presentations, handouts and the notes were given to the trainees for the knowledge and skills enhancement.
- All the courses were of 06 months each as confirmed by the participants. The attendance sheets were checked at PMU and randomly the trainees also confirmed their presence at the campus.
- After successfully completion of training the trainees were sent to undertake hands-on experience / on-job internship for couple of weeks within the industrial and commercial units pertaining to their fields of training in various trades.
- MUET is itself degree awarding institute and it is not required for it to get accreditation with the SBTE.
- Out of 256, (36.44%) participant trainees confirmed that they have been engaged with the employment at various organizations, departments, (27.89%) trainees proceeded for further education. The overall impact of employment is (64.33%) trainees engaged in employment.

The above results shows that the project has provided a good space to the needy and disadvantaged and underprivileged youth of Sindh province, who rated good to the training contents, venue, state-of-the-art infrastructure, training environment and the highly Qualified trainers.

All the participants confirmed that they had received the Monthly stipend by the Training Institute paid to them as per set criteria. The trades' selection was as per the demand of job market and the skills gained are helping them in the job market, industrial area, Associations of Commerce, trade and industry surrounded in Kotri, Hyderabad and Nooriabad, District Jamshoro.

### Recommendations

- The trainers recommended that such type of courses should be organized throughout the year so that the MUET can announce the courses with the academic year announcement. As MUET has campuses in Jamshoro and Kahirpur Mir's, so such trainings can be replicated in the Khairpur Mirs campus also.
- Due to the strict admission policies and the merit, many of the students cannot get admission in graduation programs at the MUET so such courses should be expanded more to adopt the MUET expertise to organize the course at the large scale level throughout the districts of Sindh Province.
- The contents of trainings were prepared and shared with the BBSHRRDB before the commencement of trainings so these specialized contents should be used by the other training institute as well.
- The MUET is a good platform for the BBSHRRDB to use for the specialized trainings in various trades.
- There were many trainees who belonged to other cities and were facing difficulty to attend the courses on daily basis. So, the need cum merit based scholarships should also be provided to support to them.
- During telephonic contact and physical interviews, none of the students were discovered to be fictitious. This demonstrates that the real and actual

trainees have received the appropriate training under BBSHRRDB Program launched in MUET, Jamshoro.

- Stakeholders must be strengthened in terms of both quality and quantity. The office's slightest mistake could result in the needy trainees being denied. The programme could be more successfully streamlined with the assistance of the skilled team.
- There are certain difficulties with the training programme that need to be worked out in order to make it more standardized and beneficial. Because the programme is always changing, getting all stakeholders on the same page is a difficult task. Efforts should be made to standardize training time, disbursement amounts, and comprehension of SOPs.
- There must be a system in place to keep those trainees informed who are unable to apply for scholarships due to a lack of required paperwork.

# 1. INTRODUCTION

Benazir Bhutto Shaheed Human Resource Research and Development Board [BBSHRRDB] has been established within folds of Government of Sindh with comprehensive and long-term vision to continue addressing the twin issues of poverty alleviation and eradicate the menace of un-employment from sindh province.

The Board's main division Training Program and Curriculum, Benazir Bhutto Shaheed Human Resource, Research & Development Program (BBSHRRDB) Youth Development Program (BBSYDP) is working since 2008-09. This program has trained approx. 324698 literate, semi-literate and literate youth (18-35 years of age) including almost 168,000 females, in a number of employable trades, out of which almost 47% have received decent employment

MOU signed between BBSHRRDB and MUET, in the light of Proposal for Training (PFT) approved in the Technical committee and in the meeting of Board, different trades for providing training to the trainees/unemployed youth of sindh province. So for PMU-BBSHRRDB-MUET has trained 760 youth/ trainees in various trades.

In order to validate the MUET/ORIC trainings to 760 trainers, the consulting assignment was announcement and subsequently signed with the consultant to carry out the validation exercise.

## 1.2 Purpose

BBSHRRDB intended to involve consulting firm/individual to act as third party to validate BBSHRRDB training program implemented by PMU-BBSHRRDB-MUET to verify smooth implementation of the program as per approved guidelines, and validate whether the program has resulted minimum 40% post training employment facilitation by training providers.

## 1.3 Scope of the work

The scope and extent of the Third-Party Validation (TPV) is to identify strengths and gaps in implementation and monitoring of the training program implemented by the PMU-BBSHRRDB-MUET, Jamshoro for the 02-batches comprising of 380 trainees in each.

## 1.4 Specific Objectives

The following are the specific objectives of the assignment if TPV

- To assess and validated the trainers engaged by the MUET in terms of their credentials and experience.
- To validate/assess the curriculum used to train the participant youth in their respective batches.
- To validate training delivery in accordance with the MoU signed with the Board.
- To assess and verify the training completion for instance duration of the training, attendance, the number of graduated trainees, distribution of certificates.
- To check and verify the Institute's affiliation with the Sindh Board of Technical Education (SBTE).
- To determine whether or not 40 percent of the graduates in this programme are employed (self or wage employment).

## 1.5 Team Members assigned

Following team of experts was gathered to carry out the analysis.

1	Syed Ali Raza Zaidi	Consultant/Evaluation Expert
2	Mr. Akif Ahmed Jokhio	Technical Writing
3	Mr. Muzammil Ahmed	Data Analyst

## 2. PLAN OF WORK AND METHODOLOGY

In order to accomplish the task assigned under the objectives and scope of work mentioned above, the Plan of Work and Methodology including the tools to carry out the TPV study under work completed, explained in the following sections, generally conformed to those laid down in the TORs.

### 2.1 Methodology

In order to validate the trainings and employability ratio of BBSHRDB graduates, this study used cross-sectional survey design study. The study utilized a mixed method approach. The quantitative part of the study helped to draw a big picture of the trainings delivery, trainers profile, duration and while the qualitative approach helped to evaluate programs of study and identify the areas where the program had good success and the areas where the program need improvement.

The main source of data was telephonic interviews. Further, the study also analyzed existing curricula used, trainer's profiles, reports and databases to seek any relevant information that helped to achieve the objectives of this study.

A questionnaire was developed interview were conducted, Using Orasoft calculator, the sampling was calculated with 95% confidence and 5% margin of error. With this sampling framework, out of 760 youth, 256 youth were interviewed.

Regarding the validation of trainers, curriculum, the meetings and visits were also conducted to verify them in accordance with MoU signed between the MUET Jamshoro and BBSHRRDB, Government of Sindh.

## 2.2 Sampling Framework

## 2.3 Data Collection

The consultant together with two other assistants conducted telephonic interviews of 256 trainees and conducted meetings with the Training Institute and trainers at the venue which was used for the training of youth

Data collection tools were developed including a questionnaire and one interview questions list from the trainers and training institute.

## 2.4 Survey Participants

The population of the study was 256 trainees BBSHRRDB graduates who were trained through PMU-BBSHRRDB-MUET in 02 batches during the period of 06 months each 1st batch commenced from 16<sup>th</sup> September, 2019 to 15<sup>th</sup> March, 2020 and another batch commenced from 19<sup>th</sup> October, 2020 to 18<sup>th</sup> April, 2021. The study targeted all 760 graduates in accordance with sample to represent over all trainees of the program. The study employed a sampling technique to make sure that the selected participants are representative of characteristics (program type, gender and geographic location) recommended by BBSHRRDB in the above-mentioned breakup.

## 2.5 Research Instrument

A semi-structured interview protocol (consisting of close as well as open-ended questions), focusing on the aims of the study was drafted. The protocol was pre-tested with a small group of potential participants (approximately 05-BBSHRRDB graduates randomly selected from the database of PMU-BBSHRRDB-MUET). This piloting of the instrument helped to identify and minimize ambiguities in the interview questions, leading to increased and valid responses from the participants.

## 2.6 Data analysis

All telephonic interviews were recorded and then transcribed on tool for analysis. Although various software are available for automatic transcription of software,

these programs may not be feasible for the transcription of interviews in English spoken by non-native speakers and other languages, Therefore, the transcription of recorded interviews was performed manually by our research team. Then, the data with use of excel for analyzing quantitative and qualitative data respectively to answer the specific research objectives for this study.

### 3. LIMITATIONS

While conducting this study, the consultants encountered plenty of obstacles. Some of these challenges are listed below;

- The government implemented smart and micro lockdowns in select regions to prevent the COVID-19 pandemic, making it more difficult to assemble trainees for physical interviews/verification.
- Because a few trainees were unwell with the COVID19 virus, they were interviewed over the phone.

Despite these limitations, it is greatly appreciated that management and personnel of PMU-BBSHRRDB-MUET, Jamshoro were exceptionally cooperative and supportive in the completion of this report.

## 4. FINDINGS

### 4.1 Objective: To assess and validated the trainers engaged by the MUET in terms of their credentials and experience

ORIC/ MUET engaged 33 trainers in all the 10 trades approved for the 6 months of each course. Following list shows all the trainers engaged in various trades

*Table 4 Assessment of Master and Assistant Trainers*

Since all the trainers were not available at the time of visit to MUET so a sample of 13 trainers selected for the interview.

The following 13 trainers were met during the visits to the ORIC

- Prof. Dr. Inamullah Bhatti
- Dr. Pervaiz Hameed Shaikh
- Mr. Samiullah Qureshi
- Dr. Syed Muhammad Ali
- Engr. Javed Rehman Larik
- Prof. Dr. Faisal Ahmed Memon
- Mr. Wasi Hyder
- Engr. Sajid Mangi
- Ms. Pariwash Iftikhar
- Mr. Gul Hassan Memon
- Mr. Saqib Hussain
- Engr. Sajid Ali Jamro
- Mr. Gopal das

The above trainers were met individually at their respective departments and at the PMU-BBSHRRDB-MUET at ORIC Building MUET Jamshoro verify their engagement in the trainings organized under BBSHRRDB. All of them confirmed that they had been engaged in the training sessions. CVs of the above trainers were already collected from the ORIC and all the credentials mentioned in the CVs were verified by the consultants.

The trainers seemed professionals in their respective fields and provided valuable feedback to improve the trainings and the programs which are mentioned in the recommendations of this report.

The following graph depicts the distribution of master and assistant trainers;

<b>Total</b>		<b>33</b>

The following graph depicts the academic status of Master Trainers and Assistant Trainers;

The total numbers in the light of the survey were 33 trainers, which is in accordance with the mandate mentioned in the MoU. The faculty was found to be highly qualified and competent in their respective domains.

## 4.2 Objective: To validate/assess the curriculum used to provide training to participant youth in their respective batches

The PMU-BBSHRRDB-MUET had all the courses contents and detailed scheme of lessons used for the training of the youth.

Following curriculum verified by the consultant.

- Air Conditioning and Refrigeration (HVACR) Technician
- Solar Energy Technician
- Occupational Safety and Health Supervisor
- Auto CAD Draftsman
- Programmable Logical Controller
- Optical Fiber System
- Millwright (Industrial Mechanic)
- Inspection and Quality Control
- Machinist

### The Annex A- section contains curriculum

As mentioned by the Training Institute, the above courses were recognized by the BBSHRRDB before the commencement of trainings.

## 4.3 Objective: To validate training delivery in accordance with the MoU signed with the BBSHRRDB.

The training sessions were properly planned before the training scheduled as confirmed from the schedules available at the training Institute and confirmed from the sample trainees.

The objectives mentioned in the curriculum and the schedule set day-wise were matching and the developed training material was also verified provided /shown during the visit of Training institute.

All the trainers shared that based on the curriculum and training contents, the sessions were designed for the trainees followed by the practical sessions.

One of the trainer Mr. Saqib Hussain added that “Once the training objectives have been identified, the trainer should determine how they are going to be achieved” One other trainer Mr. Wasi Hyder added that “Considerations include training content and the level of complexity. The training session may, for example, cover fundamentals or be at an advanced level. The methods to be used, the training style, and the training duration should also be considered. The trainer decides which training materials and handouts are going to be used as well as the training evaluation collection form”

#### **A sample session plan is described below**

All the sessions at the end of every month were evaluated and tests were conducted from the trainees in their respective institutes. These tests provided valuable feedback.

The trainees were assessed by the master trainers and assistant trainers in accordance with predetermined evaluation requirements, as well as the management's, Master trainer and assistant trainers', and trainees' combined opinions. When generating question papers/assessment content, the Master Trainers and Assistant Trainers followed the evaluation plan provided by the PMU.

#### **4.4 Objective: To assess and verify the training completion for instance duration of the training,**

The record was provided for the verification. After thorough checking it was confirmed that total 02 batches with 6 months each duration was completed on time at the venue provided by the MUET, Jamshoro.

The batch wise record was available at the venue confirming their attendance, duration of the training; lesson plans and copy of certificates issued to them were available.

It was seen/ checked that PMU-BBSHRRDB-MEUT registered/enrolled of 760 candidates in two batches for training in their respective sectors, among them 98% graduated after completing their course.

It was also confirmed that during the training, PMU-MUET adhered to the predetermined attendance criteria and that appropriate attendance records were maintained.

Regarding the examination efforts of management and trainers, exams were held as scheduled. A substantial majority of the trainees concurred with this.

All of the graduates received their certificates in a timely manner. The statement was taken from the proper data source. While a small number of trainees experienced a brief certification delay.

#### **4.5 Objective: To check and verify the Institute's Certificate Validation.**

Mehran University of Engineering and Technology (MUET), Jamshoro is a degree awarding institute of high repute so certificates were awarded by the concern institute.

#### **4.6 Objective: To determine whether or not 40 percent of the graduates in this programme are employed (self or wage employment).**

The most important aspect of youth skill development programmes is job creation. Given below is a brief breakdown of the current status of the graduate trainees.

Support for graduated trainee's employment: The authorities stated that the programme assisted trainees in identifying appropriate work advertisements, and the vast majority of trainees confirmed. The authorities have stated that the programme assisted trainees with work applications and job interview training, which a large majority of trainees agree with.

Current employment status of graduated trainees: The full time and self-employment status of the graduated trainees is highly satisfactory. 204 out of total 380 sample (53.68%) graduated trainees are employed on either full time or part time basis, whereas, the (21.84%) trainees proceeded for further Education. This is the very satisfying statistic that the research team has

unearthed. On the other hand, 24.48% graduated trainees are still jobless but are in pursuit of suitable opportunities. -

The data is summarized in the following table,

Table 6: Trainees Employment Status

S. No.	Status	No. of Trainees	Percentage
1	Full Time Employed	150	39.47%
2	Self-Employed	54	14.21%
3	Further Education	83	21.84%
4	Unemployed	93	24.48%
<b>Total</b>		<b>380</b>	<b>100%</b>

The following table shows the distribution of graduate trainees' job status by trade.

<b>TOTAL</b>			<b>760</b>	<b>380</b>	<b>204</b>	<b>83</b>	<b>92</b>	<b>53.68%</b>

## 5. CONCLUSION AND RECOMMENDATIONS

- The trainers recommended that such type of courses should be organized throughout the year so that the MUET can announce the courses with the academic year announcement. As MUET has campuses in Jamshoro and Kahirpur Mirs so such trainings can be replicated in the Kahirpur Mirs campus also
- Due to the strict admission policies and the merit, many of the students cannot get admission in graduation programs at the MUET so such courses should be expanded more to adopt the MUET expertise to organize the course at the large-scale level throughout the districts of Sindh province.
- The contents of trainings were prepared and shared with the BBSHRRDB before the commencement of trainings so these specialized contents should be used by the other training institute as well.
- The MUET is a good platform for the BBSHRRDB to use for the specialized trainings in various employable and job-oriented trades.
- There were many trainees who belonged to other cities and were facing difficulty to attend the courses on daily basis. So the need cum merit based scholarships should also be provided to support to them
- During telephonic contact or a physical interview, none of the students were discovered to be fictitious. This demonstrates that the real and actual trainees have received the appropriate training.
- Stakeholders must be strengthened in terms of both quality and quantity. The office's slightest mistake could result in the needy student being denied. The programme could be more successfully streamlined with the assistance of the skilled team.
- There are certain difficulties with the training programme that need to be worked out in order to make it more standardized and beneficial. Because the programme is always changing, getting all stakeholders on the same page is a difficult task. Efforts should be made to standardize training time, disbursement amounts, and comprehension of SOPs.

- There must be a system in place to keep those trainees informed who are unable to apply for scholarships due to a lack of required paperwork.

## 7. ANNEXURE II:

### Current Curriculum

#### 1. Curriculum of AutoCAD Draftsman:

S.No	Theory	Practical
1.	Orientation Day	Visit to Drawing Studio and Computer Lab
2.	Introduction to Manual Drawing	Drawing Instruments
3.	Drawing instruments	Usage of Drawing Instruments
4.	Free Hand Sketching	Fixing A3 Sheet on drawing board
5.	Lines and its Types	Drawing various lines
6.	Lines	Horizontal, Vertical, Diagonal free hand drawing and scales
7.	Understanding Different Scales	Drawing squares at different scales
8.	Scale	Draw Lines at different Scales
9.	Lettering	Lettering Practice
10.	Bedroom	Bedroom Plan practice
11.	Introduction to AutoCAD	AutoCAD Applications
12.	Installation of AutoCAD (2010 Version)	AutoCAD Installation Practice
13.	AutoCAD Basic Commands	Basic Command Practics
14.	Introduction to objects	Creating Objects
15.	Basic Drawing Settings	Basic Drawig Settings Practice
16.	Control Display Settings	Control Display Points Practice
17.	Creating File	Practice to create file
18.	Grid and Snap	Grid and Snap Practice
19.	Line, Construction Line and Polyline	Line, Construction Line and Polyline Practice
20.	Polygon, Rectangle and Arc Command	Practice to draw Polygon, Rectangle and Arc Command
21.	Circle, Revision Cloud and Spline Command	Practice to draw Circle, Revision Cloud and Spline Command
22.	Ellipse, Ellipse Arc and Insert Block Command	Ellipse, Ellipse Arc and Insert Block
23.	Make Block and Point Command	Make Block, and Point Command Practice
24.	Hatch and Gradient Command	Hatch and Gradient Command Practice
25.	Multiline Text Command	Multiline Text Command Practice
26.	Erase, Copy, Mirror and Offset	Erase, Copy, Mirror and Offset Practice
27.	Array, Move, Rotate and Scale	Array, Move, Rotate and Scale Practice
28.	Extend and Break at Point	Extend and Break at Point Practice
29.	Stretch and Trim	Stretch and Trim Practice

30.	Break and Join Commands	Break and Join Commands Practice
31.	Chamfer, Fillet and Explode	Chamfer, Fillet and Explode Practice
32.	Introduction to Application Menu of AutoCAD	Practice to AutoCAD Menu
33.	Introduction to Tab Menu of AutoCAD	Practice to Tab Menu of AutoCAD
34.	Introduction to Info Center, Status Bar, Command Window and Origin.	Info Center, Status Bar, Command Window and Origin Practice
35.	Introduction to Cross Hairs and Co-Ordinate System	Practice to Cross Hairs and Co-Ordinate System
36.	Introduction to Quick Access Bar	Quick Access Bar Practice
37.	Basic Commands (Create, copy and rename)	Basic Commands (Create, copy and rename) Practice
38.	Basic Commands (Print, Export, Publish, save & delete files)	Basic Commands (Print, Export, Publish, save & delete files Practice
39.	Geometrical Shapes	Draw different Geometrical Shapes
40.	Drawing Limits and UCS	Drawing Limits and UCS
41.	Dimension Style Setting and Text	Dimension Style Setting and Text
42.	Multiline Text	Multiline Text
43.	Drafting setting, i.e. Text style & height	Drafting setting, i.e. Text style & height
44.	Drafting setting, i.e. Units & Drawing limits	Drafting setting, i.e. Units & Drawing limits
45.	Drawing Layout Templates	Drawing Layout Templates
46.	Concept of Orthographic Projection	Concept of Orthographic Projection
47.	Basic Principle of Orthographic Projection Practice	Basic Principle of Orthographic Projection Practice
48.	solids with Top view	Practice to draw solids with Top view
49.	solids with side view	Practice to draw solids with side view
50.	solids front view	Practice to draw solids front view
51.	elements of Plans; i.e; Door	Practice to draw different types of door
52.	elements of Plans; i.e; window and parts of window	Practice to draw different types of windows
53.	elements of Plans; i.e; Ventilator	Practice to draw ventilator
54.	elements of Plans; i.e; Furniture	Practice to draw furniture in Plan
55.	Introduction of Plans (Layout Plan)	Layout Plans Practice (Manually)
56.	Introduction of Section	Different Section Practice (Manually)
57.	Introduction of Elevation	Elevation Practice (Manually)
58.	Introduction of Section	Different Section Practice (AutoCAD Software)
59.	Introduction of Elevation	Elevation Practice (AutoCAD Software)
60.	Layers	Create different layers with colors and line types
61.	Plan of Single Room	To draw plan of single room
62.	Introduction to Symbols	Practice to draw Symbols
63.	Introduction to Design Library	Design Library Practice

64.	plan of a single storey residential unit	plan of a single storey residential unit Practice
65.	Introduction of Hatching	Hatching Practice
66.	Regions and hatch in different patterns	Regions and hatch in different patterns Practice
67.	Design and Print	Applying Printing to design
68.	Introduction to 3D AutoCAD	3D AutoCAD Practice
69.	AutoCAD 3D basic interfaces	AutoCAD 3D basic interfaces Practice
70.	3D Basic Ribbons	Use different options to draw 3D Basic Ribbons
71.	AutoCAD Menu	steps of executing Pull down menus
72.	3D Modelling panels	steps to apply 3D Modelling panels Practice
73.	3D basic Comands	3D basic Commands Practice
74.	Comands	Apply the Thickness command at command prompt with different values or modify general properties of an object
75.	Comands	Execute the "Elev" command at command prompt with different values
76.	visual functions	Prepare 3D solid views of different types of stairs Straight Flight
77.	visual functions	Prepare 3D solid views of different types of Satirs Half Turn
78.	visual functions	Prepare 3D solid views of different Geometrical Shapes
79.	3D Views	3D Solid View of Balcony, Column, Doors, Projections
80.	3D Model	Single storey residential building

## 2. Curriculum of HVACR Technician:

S.No	Theory	Practical
1.	Introduction to HVACR	visualization of basic Hvac lab equipment
2.	HVAC tools and equipment	handling and using tools
3.	HVAC system testing equipment	testing of hvac equipment
4.	Basic terms in HVAC	Basic terms in HVAC
5.	Ideal gas laws	Ideal gas laws
6.	Refrigerants	visualization of refrigerant and refrigerent cylinder
7.	Vapour compression refrigeration cycle	demonstration of vapour compression refrigeration unit
8.	Evaporators	demo. On evaporator and display of tubes and fins .
9.	condensers	demo. On condenser and display of tubes and fins
10.	Throttling devices	demo. On capillary tube and its function
11.	hermetic compressors	demo. On parts and construction of hermetic compressor
12.	Types of hermetic compressors	display of reciprocating and rotary hermetic compressor
13.	Filter and drier	demo. On filter/ drier, its position in unit and purpose
14.	Air conditioning	demo. On windows AC
15.	Air conditioning	demo. On splits AC
16.	refrigeration	demo. On domestic refrigerator trainer
17.	refrigeration	demo. On cascade refrigerator
18.	Fire extinguishing	demo. On fire extinguisher
19.	vacum pump	demo. On construction and working of vacuum pump
20.	safety at hvac workshop	safety rules for hvac workshop
21.	electrical faults	electric short circuit and its causes and troubleshoot
22.	hazardous materials	handling of materials
23.	emergency at workshop	emergency procedure
24.	hvac workshop accident reporting form	filling of form
25.	Job card/work order/complaint sheet	filling of form
26.	Tasks at workshop	distribution of work at workshop
27.	psychrometry	psychrometric chart
28.	hvac equipment	Installation of hvac equipment
29.	Thermal Loads	calculation of heating and cooling load
30.	Basic air conditioning terminology	infiltration, ventilation, modes of heat transfer
31.	Ducts	calculation of size of duct and CFM of air

32.	Control wiring	control wiring circuit code and colour coding
33.	Control wiring	carry out control wiring according to drawing, wire colour coding
34.	types of wiring joints	wiring joints based on purpose
35.	series and parallel circuit	display of series and parallel circuit
36.	refrigeratin system piping	Intallation of pipes and joining of pipes
37.	refrigeratin system piping	pipe leak test, pipes hangers and insulation of pipes
38.	refrigeratin system piping	fabrication of pipes
39.	Vacum	Creation of Vacuum in HVACR System
40.	Dehydration	Dehydration of System
41.	Condensate and its formation of Condensate	Installation of Condensate Pipe
42.	Fuel Pipes	Installation of fuel Pipe and pipe seals
43.	Control System	Installation of control system
44.	Refrigerant Charging	Refrigerant Charging
45.	Refrigerant and Bio-Hazards	Seprate Bio Hazards associated with refrigerant
46.	Energy Sources for HVACR System	Seprating/Dismantalling Energy Sources from HVACR system.
47.	Electrical wire connections with equipments	Seprating/Dismantalling electrical wiring connection from HVAC equipments
48.	Vent Pipes and HVACR System	Seprating/Dismantalling Vent Pipes from HVACR System
49.	Fuel Pipes of HVACR Systems	Seprating/Dismantalling Fuel Pipes of HVACR System
50.	Duct Systems	Seprating/Dismantalling Duct System
51.	HVACR equipments and its refrigerent pipes	Seprating/Dismantalling HVACR equipments and its refrigerent pipes
52.	HVACR equipments and its water pipes	Seprating/Dismantalling HVACR equipments and its water pipes
53.	HVACR system components	Seprating/Dismantalling HVACR system components
54.	Electrical Components of HVACR system	Examination of characteristics of electrical components of HVACR system
55.	Gas Pressure in HVACR System	Measurement of Proper gas Pressure in HVACR systems
56.	Flow Rate in HVACR systems	Measurement of required Flow rate in HVACR systems
57.	Temprature at various points of HVACR system	Measurement of Temperature at various points of HVACR system
58.	Combustion chamber	Examination of Condition of combustion chamber
59.	Humidity	Measurement of Humidity
60.	HVACR system working	HVACR system working
61.	Compressors in HVACR systems	Compressor Performance test

62.	Belts in HVACR Systems	Maintaining proper or required tightness belts used in HVACR system
63.	Parts of refrigeration system	Replacement/Repair of refrigeration cycle parts
64.	Motors in refrigeration systems	Replacement/Repair of Motors in refrigeration system
65.	Compressors in Refrigeration System	Replacement/Repair of Compressors in refrigeration system
66.	Valves in refrigeration system	Replacement/Repair of Valves in refrigeration system
67.	Control System	Replacement/Repair of Control system
68.	Electrical wiring in refrigeration system	Replacement/Repair of wiring system in refrigeration system
69.	Filter and drier in refrigeration system	Replacement/Repair of filter/drier in refrigeration system
70.	Electrical Components in refrigeration system	Replacement/Repair of Electrical Components in refrigeration system
71.	Electronic Circuits in refrigeration systems	Replacement/Repair of Electronic Circuits in refrigeration system
72.	Electronic Cards in refrigeration systems	Replacement/Repair of Electronic Cards in refrigeration system
73.	Sensors in refrigeration system	Replacement of sensors in refrigeration system
74.	Heat Exchangers in refrigeration system	Replacement/Repair of Heat Exchangers in refrigeration system
75.	Gas Kits in refrigeration systems	Replacement of Gas Kits in refrigeration systems
76.	Mechanical Faults in Refrigeration System	Mechanical Faults Troubleshooting in refrigeration systems
77.	Punctuality for Professional Development	Punctuality for Professional Development
78.	Improving Professional Skills	Improving Professional Skills
79.	Keeping workplace clean and safe	Keeping workplace clean and safe
80.	Team Working	Team Working
81.	Keeping workplace safe	Keeping workplace safe
82.	Maintaining Proper Environment at workplace	Maintaining Proper Environment at workplace

### 3. Curriculum of Inspection and Quality Control:

S.No	Theory	Practical
1.	Introduction and Theory of IQC	-
2.	Quality story	Presentation, measure and analytical analysis of Quality story using multimedia and computer software.
3.	Quality tools	Presentation, measure and analytical analysis of Quality tools using multimedia and computer software.
4.	check sheets	Presentation, measure and analytical analysis of Check sheets using multimedia and computer software.
5.	Pareto diagram	Presentation, measure and analytical analysis of Pareto diagram using multimedia and computer software.
6.	Cause and effect diagram	Presentation, measure and analytical analysis of causes and effect diagram using multimedia and computer software.
7.	Cause and effect diagram	Presentation, measure and analytical analysis of Cause and effect diagram using multimedia and computer software.
8.	Histogram	Presentation, measure and analytical analysis of histogram using multimedia and computer software.
9.	Scatter diagram	Presentation, measure and analytical analysis of scatter diagram using multimedia and computer software.
10.	Flow charts	Presentation, measure and analytical analysis of Flow charts using multimedia and computer software.
11.	PDCA cycle	Presentation, measure and analytical analysis of PDCA cycle using multimedia and computer software.
12.	Quality check points	Presentation, measure and analytical analysis of Quality check points using multimedia and computer software.
13.	Direct measure of quality	Presentation, measure and analytical analysis of direct measure of quality using multimedia and computer software.
14.	Indirect measure of quality	Presentation, measure and analytical analysis of indirect measure of quality using multimedia and computer software.
15.	PDCA leadership model	Presentation, measure and analytical analysis of PDCA leadership model using multimedia and computer software.
16.	Case study PDCA	Presentation, measure and analytical analysis of case study PDCA using multimedia and computer software.

17.	Quality motivation and leadership	Presentation, measure and analytical analysis of Quality motivation and leadership using multimedia and computer software.
18.	Four stages of implementation	Presentation, measure and analytical analysis of four stages of implementations using multimedia and computer software.
19.	Introduction of ISO	Presentation, measure and analytical analysis of Introduction of ISO using multimedia and computer software.
20.	ISO 9000	Presentation, measure and analytical analysis of ISO 9000 using multimedia and computer software.
21.	Features of ISO	Presentation, measure and analytical analysis of Features of ISO using multimedia and computer software.
22.	Eight quality management principle(1)	Presentation, measure and analytical analysis of Eight Quality management using multimedia and computer software.
23.	Eight quality management principle(2)	Presentation, measure and analytical analysis of Eight Quality management using multimedia and computer software.
24.	ISO basic steps in registration	Presentation, measure and analytical analysis of ISO basic steps in registration using multimedia and computer software.
25.	ISO basic steps in registration (2)	Presentation, measure and analytical analysis of ISO basic steps in registration using multimedia and computer software.
26.	ISO standards and regulations	Presentation, measure and analytical analysis of ISO standards and regulations using multimedia and computer software.
27.	ISO standards and regulations (2)	Presentation, measure and analytical analysis of ISO standards and regulations using multimedia and computer software.
28.	Case study of ISO manufacturing industry	Presentation, measure and analytical analysis of case study of ISO manufacturing industry using multimedia and computer software.
29.	Case study of ISO manufacturing industry (2)	Presentation, measure and analytical analysis of case study of ISO 22000 manufacturing industry using multimedia and computer software.
30.	Food and safety management	Presentation, measure and analytical analysis of food and safety management using multimedia and computer software.

31.	Food and safety management (2)	Presentation, measure and analytical analysis of food and safety management using multimedia and computer software.
32.	Implementation techniques	Presentation, measure and analytical analysis of implementation techniques using multimedia and computer software.
33.	Implementation techniques (2)	Presentation, measure and analytical analysis of implementation techniques using multimedia and computer software.
34.	Case study of ISO 22000	Presentation, measure and analytical analysis of case study of ISO 22000 using multimedia and computer software.
35.	Case study of ISO 22000 (2)	Presentation, measure and analytical analysis of case study of ISO 22000 using multimedia and computer software.
36.	Introduction to ISO 14000	Presentation, measure and analytical analysis or introduction of ISO 14000 using multimedia and computer software.
37.	Introduction to ISO 14000 (2)	Presentation, measure and analytical analysis or introduction of ISO 14000 using multimedia and computer software.
38.	Environmental management systems	Presentation, measure and analytical analysis of environmental management systems using multimedia and computer software.
39.	Environmental management systems (2)	Presentation, measure and analytical analysis of environmental management systems using multimedia and computer software.
40.	Case study of ISO 14000	Presentation, measure and analytical analysis of Case study of ISO 14000 using multimedia and computer software.
41.	Case study of ISO 14000 (2)	Presentation, measure and analytical analysis of Case study of ISO 14000 using multimedia and computer software.
42.	Six sigma	Presentation, measure and analytical analysis of Six sigma using multimedia and computer software.
43.	Six sigma (belts)	Presentation, measure and analytical analysis of Six sigma (belts) using multimedia and computer software.
44.	Six sigma (belts) 2	Presentation, measure and analytical analysis of Six sigma (belts) using multimedia and computer software.

45.	Industrial usage (2)	Presentation, measure and analytical analysis of industrial usage using multimedia and computer software.
46.	Methodologies of six sigma	Presentation, measure and analytical analysis of methodology Six sigma using multimedia and computer software.
47.	DMAIC	Presentation, measure and analytical analysis of DMAIC using multimedia and computer software.
48.	DMADV	Presentation, measure and analytical analysis of DMADV using multimedia and computer software
49.	Quality assurance	Presentation, measure and analytical analysis of quality assurance using multimedia and computer software
50.	Components of QA	Presentation, measure and analytical analysis of components of QA using multimedia and computer software
51.	Quality assurance vs Quality control	Presentation, measure and analytical analysis of Quality assurance vs Quality control using multimedia and computer software
52.	TQM ( total quality management)	Presentation, measure and analytical analysis of TQM ( total quality management) using multimedia and computer software
53.	Elements of TQM	Presentation, measure and analytical analysis of elements of TQM using multimedia and computer software
54.	QI vs QA vs TQM	Presentation, measure and analytical analysis of QI vs QA vs TQM using multimedia and computer software
55.	Tools and techniques used in TQM	Presentation, measure and analytical analysis of Tools and techniques used in TQM using multimedia and computer software
56.	TQM Pakistan	Presentation, measure and analytical analysis of TQM Pakistan using multimedia and computer software
57.	Quality assurance tools	Presentation, measure and analytical analysis of quality assurance tools using multimedia and computer software
58.	Affinity diagrams	Presentation, measure and analytical analysis of affinity diagram using multimedia and computer software
59.	Tree diagram	Presentation, measure and analytical analysis of tree diagram using multimedia and computer software
60.	Matrix diagram	Presentation, measure and analytical analysis of matrix diagram using multimedia and computer software

61.	Quality audit	Presentation, measure and analytical analysis of Quality audit using multimedia and computer software
62.	Types of Quality audit	Presentation, measure and analytical analysis of types of Quality audit using multimedia and computer software
63.	Models of quality audit	Presentation, measure and analytical analysis of Models of Quality audit using multimedia and computer software
64.	Models of quality audit (2)	Presentation, measure and analytical analysis of Models of Quality audit using multimedia and computer software
65.	Phases of audit cycle	Presentation, measure and analytical analysis of Phases of audit cycle using multimedia and computer software
66.	Phases of audit cycle (2)	Presentation, measure and analytical analysis of Phases of audit cycle using multimedia and computer software
67.	Minitab	Presentation, measure and analytical analysis of Minitab using multimedia and Minitab
68.	I-MR charts	Presentation, measure and analytical analysis of I-MR charts using multimedia and computer software
69.	Process map diagram	Presentation, measure and analytical analysis of process map diagram using multimedia and computer software
70.	Line charts	Presentation, measure and analytical analysis of line charts using multimedia and computer software
71.	Normality diagram	Presentation, measure and analytical analysis of normality charts using multimedia and computer software

#### 4. Curriculum of Machinist:

S.No	Theory	Practical
1.	Introduction Machine Work Shop	Introduction Basic Bench Work operations
2.	Introduction to Measurement Tools	Basic Bench work Operations Measurement methods
3.	Introduction to Sawing and Its Types	Sawing Operation
4.	Methods Of Sawing	Sawing Practise
5.	Introduction to Filing and Its Types of Filing	Filing Operation
6.	Method of Filing	Straight Filing Operation
7.	Techniques of Filing	Surface Filing
8.	Filing	Filing Practise
9.	Driling Machine Operations	Driling hole
10.	Driling Machine Operations	Practise Driling hole
11.	Procedure of setting up of drilling machine	Driling Practise
12.	Introduction To Counter Driling	Counter Boring
13.	Counter Boring	Counter Boring Practise
14.	Introduction Counter Sinking Operation	Counter Sinking Operation
15.	Introduction To Machine Reaming	Machine Reaming
16.	Machine Reaming	Practise Machine Reaming
17.	Health and safety precautions of the company.	Identify risk of hazards at workplace.
18.	Techniques and methods to control risks of identified hazards in the workplace	Apply organizational techniques and Methods
19.	Dealing with hazards to reduce, minimise or avoid accident or injury	Recognize engineering processes and tool
20.	Occupational Health & Safety Procedures at Workplace	Use personal protective and safety equipment at all required times
21.	Personal Protective Equipment (PPE) and Its types	Develop safe work habits to ensure safety at workplace
22.	Types of hazards that are most likely to cause harm to health and safety	Recommended procedure for cleaning and storing of tools and equipment at workplace
23.	Practice safe work habits to ensure safety in the workplace	Work safety procedures and guidelines.
24.	Introduction to Lathe Machine and Types of Lathe Machine	Lathe Machine
25.	Introduction to Facing operation	Facing operation
26.	Facing	(Facing) Roughing and Finishing operation
27.	Facing operation	Facing practise

28.	Introduction To Turning	Turning operation
29.	Turning operation	Straight, Rough, Shoulder Turning
30.	Introduction to Taper Turning	Taper turning
31.	Taper turning operation	Taper turning Practise
32.	Introduction to Knurling	Knurling Operation
33.	Introducton to Lathe Machine Driling	Lathe Driling
34.	Lathe Machine Driling	Boring
35.	Introduction Threading	Threading operation
36.	Lathe Machine Operations	Practise
37.	Introduction to Shaper Machine	Shaper Machine Operations
38.	Shaper Machine Operations	Produce a squared and V shape work piece
39.	Introduction To Machine Grinding	Methods and techniques for off-hand grinding
40.	Types of different grinding machines	Perform off-hand grinding
41.	Work holding methods which include	Perform surface grinding
42.	Grinding	Practise Grindg
43.	Introduction to Milling Machine	Milling Machine operations
44.	Types of Milling Machine	Milling Machine Cutting Tools
45.	Introductiion to Milling Process	Milling Process
46.	Types of Milling operations	Milling Machine Set Up
47.	Calculation of RPM	Method and technique of adjusting RPM of milling machine
48.	Milling Machine operations	Produce a square shaped work piece
49.	Calculation of spur gear	Explain gear cutting procedur
50.	spur gear	Perform spur gear cutting
51.	the procedure of slotting and grooving	slotting or grooving on work piece
52.	Drilling or Boring using Milling Machine	Perform Drilling or Boring using Milling machine
53.	Introduction to Machine Maintenance and Its Types	Method of keeping record of maintenance schedule
54.	Preventive Maintenance of Machines and Tools	Identify faulty/damaged/ worn out parts
55.	Preventive Maintenance of Machines and Tools	Understand machine operations
56.	Preventive Maintenance of Machines and Tools	Methods of Preventive Maintenance
57.	Introduction to general housekeeping and maintenance of machines and tools	Methods and techniques for cleanliness and maintenance of machines and tools.
58.	General housekeeping and maintenance of machines and tools	Specific guidelines and checklists to conduct maintenance
59.	Introduction to general housekeeping and maintenance of machines and tools	Carry out Machine Maintenance

## 5. Curriculum of Millwright:

S.No	Theory	Practical
1.	Introduction Machine Work Shop	Introduction Basic Bench Work operations
2.	Introduction to Measurement Tools	Basic Bench work Operations Measurement methods
3.	Introduction to Sawing and Its Types	Sawing Operation
4.	Methods Of Sawing	Sawing Practise
5.	Introduction to Filing and Its Types of Filing	Filing Operation
6.	Method of Filing	Straight Filing Operation
7.	Techniques of Filing	Surface Filing
8.	Filing	Filing Practise
9.	Introduction to Drilling and Types Drilling Machines	Introduction Types of Drilling Machine
10.	Drilling Machine Operations	Drilling hole
11.	Drilling Machine Operations	Practise Drilling hole
12.	Procedure of setting up of drilling machine	Drilling Practise
13.	Introduction To Counter Drilling	Counter Boring
14.	Counter boring, Specific safety precautions during boring	Counter Boring Practise
15.	Introduction Counter Sinking Operation	Counter Sinking Operation
16.	Machine Reaming	Practise Machine Reaming
17.	Introduction to Occupational Health and Safety	Observe OHS and work
18.	Health and safety precautions of the company.	Identify risk of hazards at workplace.
19.	Techniques and methods to control risks of identified hazards in the workplace	Apply organizational techniques and Methods
20.	Dealing with hazards to reduce, minimise or avoid accident or injury	recognize engineering processes and tool
21.	Occupational Health & Safety Procedures at Workplace	Use personal protective and safety equipment at all required times
22.	Personal Protective Equipment (PPE) and Its types	Develop safe work habits to ensure safety at workplace
23.	Practice safe work habits to ensure safety in the workplace	Work safety procedures and guidelines.
24.	Introduction to Lathe Machine and Types of Lathe Machine	Lathe Machine
25.	Lathe Machine Operations	methods and techniques of mounting work-piece

26.	Introduction to Facing operation	Facing operation
27.	Facing	(Facing) Roughing operation
28.	Introduction To Turning	Turning operation
29.	Turning operation	Straight Turning
30.	Introduction to Taper Turning	Taper turning
31.	Taper turning operation	Taper turning Practise
32.	Introduction to Knurling	Knurling Operation
33.	Introducton to Lathe Machine Driling	Lathe Driling
34.	Lathe Machine Driling	Boring
35.	Introduction Threading	Threading operation
36.	Introduction To Grinding	Methods and techniques for off-hand grinding
37.	Types of different grinding machines	Perform off-hand grinding
38.	Work holding methods which includ	Perform surface grinding
39.	Grinding	Perform universal cylindrical grinding and cutter grinding
40.	Introduction to Milling Machine	Milling Machine operations
41.	Types of Milling Machine	Milling Machine Cutting Tools
42.	Introductiion to Milling Process	Milling Process
43.	Types of Milling operations	Milling Machine Set Up
44.	Calculation of RPM	Method and technique of adjusting RPM of milling machine
45.	Milling Machine operations	Produce a square shaped work piece
46.	Calculation of spur gear	Explain gear cutting procedur
47.	spur gear	Perform spur gear cutting
48.	The procedure of slotting, grooving and milling operations	slotting or grooving on work piece
49.	Introduction to Welding and its types & Method.	Gas & Electric Welding
50.	Introduction to Electric Welding and Its Types	Electric welding process
51.	Gas welding and Its types	Gas welding process
52.	Different types of welded joints	Types of welded joints; Butt Joint, corner, tee, edge joints
53.	Introduction to Power Transmission System	Grouping of Various Components of Transmission system
54.	Introduction to Belt Drive and its types	identification and Installation of Belt drives
55.	Introduction to Chain Drives	Identification and Slection of Chain Drives using Measuring tools

56.	Describe and perform the installation and alignment of belt and chain drives	Check belt and chain drives for wear, misalignment
57.	Introduction to Shaft Alignment	procedures used to determine shaft alignment
58.	Shaft Alignment	Pre-alignment checks and align shafts using methods
59.	Shaft Alignment	feeler and straight-edge
60.	Shaft Alignment	Two dial indicators and Computer-laser
61.	Shaft Alignment	Methods for repairing shafts
62.	Introduction to Pumps, Valves & Piping	oidentification and Installations of Pumps, Valves & Piping
63.	Industrial Pumps	Installation and Application of Industrial Pumps
64.	Industrial Pumps	verhaul and maintenance of industrial pumps
65.	Valves	dentify and select valves for specific applications
66.	Valves	Different Types of Valves and Its Application
67.	Introduction to Electrical & Electronic Controls	use of basic electrical testing instruments
68.	Introduce open and closed loop control systems	Analog and digital signals
69.	Introduction to electronic devices used in control system	Thermal devices, limit switches, proximity switches photo cells
70.	Introduction to Sensors and Transducers	Identification and Use of Sensors and Transducers

## 6. Curriculum of MT&HT:

S.No	Theory	Practical
1.	Introduction Machine Work Shop	Introduction Basic Bench Work operations
2.	Introduction to Measurement Tools	Basic Bench work Operations Measuremenmt methods
3.	Introduction to Sawing and Its Types	Sawing Operation
4.	Sawing	Sawing Practise
5.	Introduction to Filing and Its Types of Filing	Filing Operation
6.	Method of Filing	Straight Filing Operation
7.	Filing	Filing Practise
8.	Introduction to Drilling and Types Driling Machines	Introduction Types of Driling Machine
9.	Driling Machine Operations	Driling hole
10.	Driling Machine Operations	Practise Driling hole
11.	Procedure of setting up of drilling machine	Driling Practise
12.	Introduction To Counter Driling	Counter Boring
13.	Counter Boring	Counter Boring Practise
14.	Introduction Counter Sinking Operation	Counter Sinking Operation
15.	Counter Sinking	Counter Sinking
16.	Counter Sinking	Practise Counter Sinking
17.	Introduction To Machine Reaming	Machine Reaming
18.	Machine Reaming	Practise Machine Reaming
19.	Introdcution to Occupational Health and Safety	Observe OHS and work
20.	Health and safety precautions of the company.	identify risk of hazards at workplace.
21.	Techniques and methods to controlrisksof identified hazards in the workplace	Apply organizational techniques and Methods
22.	Dealing with hazards to reduce, minimise or avoid accident or injury	ecognize engineering processes and tool
23.	Dealing with hazards to reduce, minimise or avoid accident or injury	Practise OHS Techniques
24.	Occupational Health & Safety Procedures at Workplace	Use personal protective and safety equipment at all required times

25.	Personal Protective Equipment (PPE) and Its types	Develop safe work habits to ensure safety at workplace
26.	Types of hazards that are most likely to cause harm to health and safety	Recommended procedure for cleaning and storing of tools and equipment at workplace
27.	Practice safe work habits to ensure safety in the workplace	Work safety procedures and guidelines.
28.	Introduction to Lathe Machine and Types of Lathe Machine	Lathe Machine
29.	Lathe Machine Operations	methods and techniques of mounting work-piece
30.	Introduction to Facing operation	Facing operation
31.	Facing	(Facing)Roughing operation
32.	Facing	(Facing)Finishing operation
33.	Facing operation	Facing practise
34.	Introduction To Turning	Turning operation
35.	Turning operation	Straight Turning
36.	Turning operation	Shoulder Turning
37.	Introduction to Shaper Turning	Shaper turning
38.	Shaper turning operation	Shaper turning Practise
39.	Introduction to Knurling	Knurling Operation
40.	Introducton to Lathe Machine Driling	Lathe Driling
41.	Lathe Machine Driling	Boring
42.	Introduction Threading	Threading operation
43.	Shaper Machine Operations	Produce a squared shape work piece
44.	Shaper Machine Operations	Squared shape work piece Practise
45.	Shaper Machine Operations	Produce V shaped work piece
46.	Shaper Machine Operations	V shaped work piece Practise
47.	Introduction To Machine Grinding	Methods and techniques for off-hand grinding
48.	Types of different grinding machines	Perform off-hand grinding
49.	Work holding methods which includ	Perform surface grinding
50.	Grinding	Practise Grindg
51.	Grinding	Perform universal cylindrical grinding
52.	Introduction to Milling Machine	Milling Machine operations
53.	Types of Milling Machine	Milling Machine Cutting Tools
54.	Introductiion to Milling Process	Milling Process
55.	Types of Milling operations	Milling Machine Set Up
56.	Calculation of RPM	Method and technique of adjusting RPM of milling machine

57.	Milling Machine operations	Produce a square shaped work piece
58.	Calculation of spur gear	Explain gear cutting procedur
59.	spur gear	Perform spur gear cutting
60.	the procedure of slotting and grooving	Slotting or grooving on work piece
61.	Drilling or Boring using Milling Machine	Perform Drilling or Boring using Milling machine
62.	Milling Operations	Practise
63.	Introduction to Machine Maintenance and Its Types	Method of keeping record of maintenance schedule
64.	Preventive Maintenance of Machines and Tools	Identify faulty/damaged/ worn out parts
65.	Preventive Maintenance of Machines and Tools	Understand machine operations
66.	Preventive Maintenance of Machines and Tools	Methods of Preventive Maintenance
67.	Introduction to general housekeeping and maintenance of machines and tools	Methods and techniques for cleanliness and maintenance of machines and tools.
68.	General housekeeping and maintenance of machines and tools	Specific guidelines and checklists to conduct maintenance
69.	Introduction to general housekeeping and maintenance of machines and tools	Carry out Machine Maintenance

## 7. Curriculum of Optical Fiber System Technician:

S.No	Theory	Practical
1.	Demonstration of Lab and Equipment's	Real Time visualization of Equipment
2.	Lab and Optical Fiber Safety Precautions	Practical use of Fiber precautions
3.	Importance of Light and Their applications	Fiber Types and Kits
4.	History of Light	Light Travel and How it transmit data signals
5.	Light Properties and their basics	Practical verification of Light Properties
6.	Total Internal Reflection	Real time test of TIR
7.	Power Meter and Source Meter	Fiber Power meter testing
8.	Visual Fault Locator	Fiber Testing using VLF
9.	Basic of Optical Fiber Kit	Practical Power Transmission and Reception
10.	Power Control	Power Measurements using Optical Kits
11.	Basic of Fiber Losses	Measurement of Power Loss in Fibers
12.	Patch Cords and Connectors	Visualize, identify and Connect the connectors with ports
13.	Presentation Skills and Cv Writing Tips	Presentations and Tools for Cv Writing
14.	Audio Signal transmission	Audio Transmission by Optical Kits
15.	Attenuation Losses and Attenuation Co-efficient	Measurement of Attenuation Losses using different Length Fibers
16.	Discussion of Connectors	Practically use of Connectors in Industry
17.	Patch Cords identification for power meter	Connect Power meter and Source Meter
18.	Opti-System Software	Installation of software
19.	Link Parameters	Optical System Design
20.	Earth Map	Google Earth Map to test link sites
21.	Properties of photodiode and Sources (LED, LASER)	Hands on Optical Kit to analyze source and photodiode properties
22.	Fiber Primary and Secondary Coating Removing steps	Removal of Primary and Secondary Coating
23.	Fiber Stripping and Cutting at 90	Fiber Cutting by Clever
24.	Splicing Machine	Fiber Splicing
25.	Procedure of Fiber Jointing	Jointing and Splicing
26.	Workshop on Excel and its industrial importance	Practice on Excel
27.	Optical Windows used for Communication	Practice on optical windows for power and data transmission
28.	Types of Losses in Fibers	Analysis of Losses in Fiber

29.	Different between LEDs and LASER Wavelength	LED and LASER practical visualization
30.	Function Generator and Oscilloscope	Working of Oscilloscope and Function Generator
31.	Basic on Signals	Signal generation and Visualization
32.	Basics of Signal generated by Optical Kit	Transmit different signals and investigate Powers
33.	Signal Properties	Practical see the signal properties effects
34.	Testing procedure of Fibers	Spliced Fiber Test
35.	Visible Light Spectrum	To test the effects of Visible Light in Fiber
36.	Infra-red optical Link	Power testing and attenuation
37.	Safety and Precautions	Rules and Safety rules of Fiber splicing and testing
38.	Photodiode Operation	Photodiode current and Voltage Measures
39.	Theoretical and Practical Test	Revision of Practical's
40.	Optical Kit Specifications	Check the specification and differentiate ports of detection
41.	Overall performance Test	Test the Optical kit link performance
42.	Introduction to Splicing	Familiar with Splicing Machine
43.	Types of Splicing	Manual Splicing
44.	Fiber end preparation	Preparation of fiber end
45.	Fiber Secondary coating removing steps	Secondary coating removing
46.	Primary Coating and Cladding	Removing of Primary Coating and Cladding
47.	Introduction of Fiber core and Cladding	Cladding stripping and core cleaving
48.	Fiber Alignment in Splicing Machine	Fiber alignment in Splicing Machine
49.	Arc Checking	Arc Checking in Splicing Machine
50.	Maintenance of Splicing Machine	Maintain splicing machine
51.	Fusion Types	Automatic and Manual
52.	Heating of Fiber	Sleeve Heating in Fiber
53.	Fiber Termination	Fiber termination in ODF
54.	Termination of Fiber in Joint Box	Practice Jointing Machine
55.	Introduction of Media Convert	To check and Configure Media Converter
56.	Basics of SFP	Enabling the SFP in Media Converter
57.	Patch Cord Connection in Media Converter	Pigtail and Fiber Termination
58.	Fiber Transmission through LED and LASERS	Basic Circuit Design using LEDs, Resistors and LDRs
59.	Operational Amplifiers	Design of Operational Amplifiers for Increase detection Values
60.	Optical Link using LASERS	Design Optical Link using Solar Panel and LASERS

61.	Introduction of OTDR	OTDR Measurements
62.	OTDR Measurement	Practice on OTDR Measurements
63.	ODTR events	Practical discussion on events
64.	Identification of Events	To check events and fault location
65.	Fiber Distance Measurements	OTDR fault detection and Distance Measurement
66.	Fiber Jointing	Practice
67.	Fiber Splicing	Practice Splicing
68.	Fiber Power Measurement	After Splicing Power Measurement
69.	Coordinate Measurement	GIS mapping by Coordinates
70.	Site Survey and Coordinates	Fiber Length and other accessories
71.	Basic Optical Link Design	Using Arduino, Transmit audio signals with solar panel and Photodiodes
72.	Fault Detection	Fault Detection in Fiber by VLF/OTDR
73.	Communication Skills	Presentations and Technical analysis
74.	CV and Email writing	Practice on CV and Email Writing
75.	Job Search	Job Hunting Tactics
76.	Technical Summary	Technical Preparation
77.	Mock Interviews	Arrange Mock interviews
78.	Fiber system Testing	Using optical Kits to test performance of Link
79.	Power Measurements, Connectrization, Troubleshooting of Network Problems	Practice in Real time link
80.	Installation of ODF	Fiber Termination and Measurements
81.	Joint Box	Installation of Joint Box
82.	Mechanical Splicing	Practicing Mechanical Splicing
83.	Single and Multimode Fiber	Identifying Fibers and Testing
84.	Job Market in Pakistan and Worked	Search Jobs of Optical Fiber Technician
85.	Align CV for job responsibilities	Make CV with respective the expertise
86.	Fiber Alignment and Splicing	Splicing
87.	Site Testing	Site Survey, Power Measurements, ODTR, Media Converter Configuration and Final Link Testing
88.	Review of the training	Final Practical Test
89.	Health & Safety	Health & Safety
90.	Media Converter Resting and Configuring	IP configuration in Converter
91.	Link Troubleshooting	Link Testing with IP
92.	IP Planning	IP deployment
93.	Project Test	Analysis and Reporting

## 8. Curriculum Occupational Safety and Health:

S.No	Contents
1.	Work Environment
2.	Introduction and basic concepts
3.	Recognition of health hazards
4.	Evaluation of Health Hazards
5.	Risk Assessment
6.	Occupational ergonomics
7.	Human factors engineering
8.	Work physiology
9.	Occupational biomechanics
10.	Health education in occupational health
11.	Occupational diseases
12.	Occupational accidents
13.	Work environment and control measures
14.	Prevention of occupational diseases and accidents Legislation
15.	Effects of lifestyle and behavior on health
16.	Health education in the workplace
17.	Communication skills in health education
18.	First aid and its practice
19.	Objectives
20.	Importance of first aid
21.	Injuries
22.	Fractures
23.	Thermal injuries
24.	Poisoning
25.	Hemorrhage
26.	Impaired breathing
27.	Hydrojettting Safety
28.	Equipment
29.	Hazards
30.	Precautions
31.	Use in confined space
32.	Personal Protective Equipment
33.	Scope of PPE
34.	PPE selection guidelines
35.	Eye and Face Protection
36.	Head Protection
37.	Foot and Leg Protection
38.	Hand and Arm Protection
39.	Body Protection

40.	Hearing Protection
41.	Fire Safety
42.	Phenomenology of Combustion
43.	Fire Prevention Measures
44.	Forms of Combustion
45.	Extinguishing Agents
46.	Scaffolding (Work at Height)
47.	Awareness
48.	Types of Scaffolding
49.	Scaffolding Basics
50.	Erecting Scaffolds
51.	Inspection of scaffolds
52.	Do's and Don'ts
53.	Working in Confined Spaces
54.	Risk Management Approach to Confined Spaces
55.	Types of Hazards in Confined Spaces
56.	Working Safely in Confined Spaces
57.	Training for Personnel Involved in Confined Space Entry and Work
58.	Emergency and Rescue Procedures
59.	Safe Work Permits
60.	Types of Work Permits
61.	General Procedures
62.	Pitfalls of Work Permit
63.	Accident Investigation
64.	Investigation Process
65.	Gather Evidence
66.	Determine the Root Cause
67.	Document the Findings
68.	Cause Determination (Fault Tree Analysis)
69.	Electrical Safety
70.	Electrical Hazards
71.	Electrical safety principles and controls
72.	General Electrical Safety for All Persons
73.	Shock Protection
74.	General Electrical Safe Work Practices
75.	Crane Safety
76.	Introduction
77.	Cranes types
78.	Controlling hazards
79.	OSHA Recordkeeping
80.	Employer Responsibilities
81.	Employee Responsibilities
82.	General Recording Criteria
83.	Additional Recording Criteria
84.	Maintaining Forms
85.	Calculating Injury and Illness Incidence Rate
86.	Hand Injury
87.	OSHA Regulation related Hand Injury
88.	Hand Hazards

89.	Hand care & Types of injuries
90.	ISO-45001
91.	O&HS Managements systems
92.	Legal requirements of OHSMS
93.	Implementation of ISO-45001
94.	Purpose of OHSMS

## 9. Curriculum of Programmable Logical Controller:

S.No	Theory	Practical
1.	General Overview of (PLC)	-
2.	General introduction of safety	-
3.	Introduction of Electrical safety	Demo how to save if any one shocked from electric
4.	General introduction of hand tools	How to use screw drivers in job (practice)
5.	How to detect faulty hand tool	Hand tool inspection (practice )
6.	Deferent Tips for using Hacksaw	Cutting with Hacksaw (practice )
7.	Introduction of player types	Wire cutting practice with player
8.	Introduction of Electrical Symbols	How to read electrical wiring diagram (practice )
9.	Introduction Electrical wiring	How to make Electrical wiring diagram (practice )
10.	General introduction of electricity	Voltage measuring practice with Voltage Meter
11.	Introduction of(Thermal power)	Current measuring practice with Ampere Meter
12.	Introduction of (Wind power)	Wattage calculation practice with V & A Meter
13.	Introduction of Series Circuit	Lab practice with Series Circuit
14.	Parallel Circuit calculation	Lab practice with Parallel Circuit
15.	Resistance color coding	Lab practice Resistance color coding
16.	Introduction how to measure resistance with multi Meter	Lab practice with Ohms Meter
17.	Introduction test lamp circuit	Lab practice how to make testing board for troubleshooting with safety breakers
18.	Test lamp circuit tips	Lab practice with testing lamp
19.	Introduction of electric button 220v light indicators	Lab practice with light indicators
20.	Introduction of normally open switch	Lab practice with normally open switch
21.	Normally close switch interfacing	Lab practice with normally close switch
22.	Introduction of single phase AC induction motor	Lab practice with single phase AC induction motor
23.	Introduction of servo motor	Lab practice with servo motor
24.	Introduction of three phase AC induction motor	Lab practice with three phase AC induction motor

25.	Introduction of PLC safety	Lab practice with Software installation
26.	Introduction of PLC Software and Installation	Software installation error removing practice
27.	Introduction PLC hardware and installation	PLC hardware installation practice
28.	Introduction of PLC programming	PLC Programming lab practice
29.	Introduction of PLC output	PLC Programming lab practice
30.	Introduction of PLC timers	PLC Programming lab practice
31.	Introduction of PLC counters	PLC Programming lab practice
32.	Introduction PLC set and reset	PLC Programming lab practice
33.	Introduction of PLC advance topic	PLC motor interfacing lab practice
34.	PLC interfacing with Motors	PLC motor interfacing lab practice
35.	Industrial process control with PLC	PLC process control programming lab practice
36.	PLC process control programming	PLC process control programming lab practice

**10. Curriculum of Solar Energy System Technician:**

S.No	Theory	Practical
1.	Charge its properties and methods of charging	Current calculation
2.	Current Flow Theory	Current measurement
3.	Basic quantities and notations of Electricity	Electricity notations
4.	Ohms law and its application	Ohms law verification problems demonstration
5.	Relationship between voltage, current, resistance and power	V, I, R and P conversion demonstration
6.	Power and its unit conversion	Units conversion demonstration of Power
7.	Energy and its unit conversion	Energy units conversion
8.	Relationship between power and Energy	Power and energy units conversion problems demonstration
9.	Types of Current: AC and DC	Understanding Measurement
10.	Standard representation of Electrical components	standard representation of components demonstration
11.	Wiring diagram and Schematic Diagram	Electrical drawings demonstrations
12.	Basic Electrical Circuits	Series circuit calculations demonstration
13.	Basic Semiconductor Physics & PN Junction	diode demonstration
14.	Domestic Solar System and Other application of Solar Energy	Battery and Cell demonstration
15.	Advantages and Limitations of Solar Systems	solar system demonstration
16.	Photovoltaic Modules- History and Background	PV cell products demonstration
17.	Diagrams and working principles	PV module operation
18.	Types of Solar Cells	PV cell materials demonstration
19.	Photovoltaic Modules	different companies PV modules comparison
20.	Main Characteristics of PV Module	PV cell efficiency Checking
21.	Association of Modules in series and parallel	Module series connection calculations
22.	Energy from PV Modules	PV cell current measurement
23.	Quality control when purchasing modules	checking of quality of modules
24.	The Functions of a regulator	The Functions of a regulator

25.	Types of regulator	Types of regulator
26.	Quality control when choosing and purchasing regulators	Quality control when choosing and purchasing regulators
27.	Batteries Introduction	Batteries Introduction
28.	Terms used to specify batteries	Terms used to specify batteries
29.	Types of batteries	Types of batteries
30.	General characteristics of lead-acid batteries	General characteristics of lead-acid batteries
31.	Most common types of lead-acid battery	Most common types of lead-acid battery
32.	Association of batteries in series or in parallel	Association of batteries in series or in parallel
33.	Notion of battery sizing	Notion of battery sizing
34.	Safety precautions for battery installation and maintenance	Safety precautions for battery installation and maintenance
35.	Class Test	Class Test
36.	Practical demonstration	Practical demonstration
37.	Loads and appliances	Loads and appliances
38.	Inverters	Inverters
39.	DC-DC adapters and converters	DC-DC adapters and converters
40.	Choice of cables and voltage drops	Choice of cables and voltage drops
41.	Electrical and lightning protection	Electrical and lightning protection
42.	Quality control when purchasing loads, inverters and cables	Quality control when purchasing loads, inverters and cables
43.	Evaluation of the client's energy needs	Evaluation of the client's energy needs
44.	Solar array sizing	Solar array sizing
45.	Battery sizing	Battery sizing
46.	Choosing the regulator	Choosing the regulator
47.	Fuses	Fuses
48.	Cable sizing with a practical example	Cable sizing with a practical example
49.	Making a price quotation for a solar system	Making a price quotation for a solar system
50.	Definition of a correct installation	Definition of a correct installation
51.	Preparing and organizing your work	Preparing and organizing your work
52.	PV module installation	PV module installation
53.	Battery installation procedure	Battery installation procedure
54.	Regulator installation procedure – charging the battery	Regulator installation procedure – charging the battery
